Computer Science and Engineering graduate with hands-on experience in building scalable, cloud-based applications using React, JavaScript, and SQL. Strong foundation in full-stack development, object-oriented programming, data structures, and with internship experience delivering production-ready features in collaborative engineering teams.

EDUCATION

B.S. Computer Science and Engineering - University of California, Merced

August 2021 - May 2025

Relevant Courses: Software Engineering, Full Stack Web Development, Database Systems Implementation, Discrete Mathematics, Data Structures, Algorithm Design and Analysis, Computer Organization and Assembly Language, Object Oriented Programming, Mobile Computing, Cryptography

PROJECTS

Digital AI Backpack - React.js, JavaScript, Firebase, AI Genkit, Flowise

Conectado Inc.

- Contributed to a production AI-powered web platform helping students discover opportunities and peer connections
- Built React components, enhanced algorithms, and integrated Firebase for authentication and real-time data handling
- Enhanced AI chatbot interaction flows and UI to improve response quality and user engagement

Library Application - React.js, JavaScript, OpenAPI, MySQL, Clever-Cloud

- Developed a full-stack library application with secure user authentication and personalized reading lists
- Designed RESTful APIs and MySQL schemas to manage users, books, and CRUD operations
- Integrated a third-party book search API and developed a responsive React frontend

World Journal Application - React, Vite, JavaScript, MongoDB

- Developed backend logic to store, retrieve, and aggregate user-generated journal entries
- Integrated MongoDB to persist daily entries and support efficient document-based queries
- Implemented CRUD workflows to enable users to publish and browse shared journal content

Hinodde - Vite + ReactJS, JavaScript, HTML, CSS

- Developed a Wordle-style single-page application supporting unlimited gameplay sessions
- Implemented randomized word generation and client-side game logic using React state
- Designed a responsive, accessible UI focused on performance and user experience

EXPERIENCE

Academic Tutor - Bounce Back In-Home and Online Tutoring Services

January 2022 - Present

- Provided personalized online tutoring via Zoom for students ranging from Kindergarten to High School for many subjects
- Designed customized lesson plans, assisted with homework, and prepared students for exams
- Developed strategies to improve academic performance and fostered a positive learning environment

Electrical Engineering Social Media Content Creator - UC Merced

February 2025 - May 2025

- Pioneered the first social media Instagram page for the Electrical Engineering Department
- Created 20+ content including graphics, videography, and photography to showcase staff, students, and department events
- Collaborated in three weekly strategy meetings with faculty and student coworkers, aligning content calendar with achievements and progress, as well as future plans

Full Stack Intern - Conectado Inc.

August 2024 - December 2024

- Designed, deployed, and maintained cloud-hosted services supporting a production AI-driven platform
- Developed responsive UI components in React and Material-UI, optimizing usability and engagement
- Implemented a merge sort-based filter and sorting tool to efficiently organize and display user profiles
- Enhanced an algorithm to improve user matching efficiency by refining similarity-based profiling techniques
- Integrated and enhanced an AI-powered chatbot to recommend user connections

TECHNICAL SKILLS

Languages:

JavaScript, TypeScript, Python, SQL, Java, C++, C

Frontend and Backend:

HTML, CSS, React.js, Vite, Node.js, Express, Flask, RESTful APIs, HTTP, JSON

Database Management and Cloud Platforms:

MySQL, SQLite, MongoDB, Firebase, Google Cloud Platform

Tools and Technologies:

Git, Docker, Authentication (JWT, sessions), OpenCV, AI Genkit, Flowise

EXTRACURRICULAR ACTIVITIES

J.P. Morgan Software Engineering Virtual Experience on Forage

July 2024

- Prepared a local dev environment by downloading the necessary files, tools and dependencies.
- Fixed broken files in the repository to make web application output correctly.
- Used JPMorgan Chase's open source library called Perspective to generate a live graph that displays a data feed in a clear and visually appealing way for traders to monitor.

Historian for the Bobcat Band - University of California, Merced

August 2022 - May 2024

- Founded and led the first Historian Committee to design yearbooks showcasing the club's annual milestones and achievements
- Managed and grew the Bobcat Band's social media presence, producing engaging posts, fliers, stories, and YouTube videos, resulting in a 500+ follower increase on Instagram.
- Collaborated with fellow officers in weekly meetings to align on goals, streamline communication, and execute club initiatives effectively.
